Arts Facts . . . Improved Academic Performance

Students who participate in the arts, both in school and after school, demonstrate improved academic performance and lower dropout rates.

### Facts

- Arts in the schools increase test scores and lower dropout rates. The Arts Education Partnership’s publication, *Critical Links*, contains 62 academic research studies that, taken together, demonstrate that arts education helps close the achievement gap, improves academic skills essential for reading and language development, and advances students’ motivation to learn.

- Longitudinal data of 25,000 students demonstrate that involvement in the arts is linked to higher academic performance, increased standardized test scores, more community service and lower dropout rates (see chart above). These cognitive and developmental benefits are reaped by students regardless of their socioeconomic status.

- Research conducted between 1987 to 1998 on young people working in the arts for at least three hours on three days of each week throughout at least one full year, demonstrated the following:
  - 4 times more likely to have been recognized for academic achievement
  - Being elected to class office within their schools more than 3 times as often
  - 4 times more likely to participate in a math and science fair
  - 3 times more likely to win an award for school attendance
  - 4 times more likely to win an award for writing an essay or poem
